MARKET OVERVIEW

GTA Homes Sales Up, Selling Prices Down

The GTA housing market continued to tighten with new listings down year-over-year as sales increased in March 2026. The market continues to be flat as both buyers and sellers are undecided as prices are expected to decline further in 2026. Current market conditions currently favour buyers who continue to have strong negotiating power in this market. However, the GTA housing supply pipeline is in danger of running dry in the medium-to-long term as new listings continue to decline.

Interest rates are expected to remain unchanged for 2026, despite inflationary pressures from rising energy costs and continued macroeconomic uncertainty. Broader market rebound is expected for 2027. Pent-up demand continues to build in Ontario and as prices continue to decline, it is expected to help build sales momentum into 2027.
